Encaustic Cement Tiles

200x200x16mm

Link designed by Gemma
Fabbri takes its inspiration from
geometry and tradition.

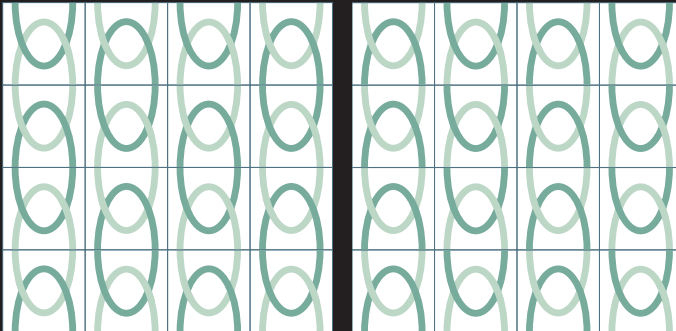

The pattern can be combined with
different colour ways for a bold
graphic finish or in a two toned
more traditional look.

The British Tile Collection

Born from an idea to take the
traditional and ancient technique
of making encaustic tiles and
marry it to contemporary designs.

WorkHouse commissioned
artists and designers whose
work reflected their own vision
to create products that echo the
past whilst looking to the future.
